

# Buserelin Vet 10 ml Inj.

(Buserelin 0.004mg/ml)

Gonadotropin Releasing Hormone Analogue (GnRH)

## COMPOSITION:

Each ml contains Buserelin acetate 0.0042 mg equivalent to 0.004 mg buserelin. Buserelin is equivalent to the natural LH/FSH releasing hormone produced in the hypothalamus.

## MODE OF ACTION

BuserelinVet causes simultaneous release of luteinizing hormone (LH) and follicle stimulating hormone (FSH) from the anterior pituitary.

## DOSAGE

BuserelinVet is preferably given by intramuscular injection. However, the intravenous or subcutaneous routes may also be used if desired.
